

LIGHTROOM Advanced Workshop by Rob Davidson

Already working with Lightroom, and ready to explore some of its more advanced (or hidden) features? You're really going to like this workshop! We'll explore methods to really kick your workflow into high gear, and do things with Lightroom that you've probably never even thought about!

Topics Covered:

- Streamline your keywording (so it actually gets done!)
- Hidden shortcuts and features throughout Lightroom
- Using the Dual Screen mode (even if you don't have two monitors)
- Using Library filters to sort, find and organize your photos
- Using collections and smart collections
- Importing and exporting catalogues (and why you would want to do this)
- Creating "special effects" in the Develop module
- Understanding and using the local adjustment tools
- Creating beautiful B&W renderings
- Working with Develop presets (and where to find some very cool ones)
- Using Snapshots and History to smooth your workflow
- Lightroom to Photoshop workflow options
- Using the print module to create unique layouts and posters
- Evaluating and improving your prints
- Finding and working with advanced web galleries
- Using export plug-ins to further extend and enhance your workflow
- Shooting "tethered" to Lightroom

As you can see, we'll be covering quite a lot of information, so you'll also receive a complete set of notes to refer to as you explore Lightroom on your own.

Workshop Date: Saturday, May 22 9:30- 5:00
Location: My studio in Downtown Toronto (Liberty Village)
Workshop fee: \$210 (incl GST) \$100 deposit to register
